

## **THE MIDNIGHT FIRE**

"Every midnight a shimmering fire stands shining above the beautiful, mythical City of Magical Myths." said George to his younger sister Sarah. "At least that's definitely what legends believe."

One morning George and Sarah went to see their family but, on their way, they saw a plane with a note saying, hop on I'll take you to the midnight fire that's very beautiful.

George and Sarah excitedly got in and pressed the auto pilot button. If they were steering it would be a disaster, as they didn't know how to fly. They began to explore the plane.

George saw a glimpse of light and shouted "SARAH, SARAH THERE'S A LEGEND HERE". They opened the legend and the book started talking. It said, "Hi George and Sarah". "H...h...how...how do you n...n...know us?". "I'm a legend, of course I know you're here" answered the legend. "My name is 3.0.6. This is my home, **The Midnight Fire**. I live here, all legends like me live here and we make **The Midnight Fire**, out of books. We write the books and build a statue of books shaped like a fire, at midnight. Every day we replace the books that we've used and send them to the fantastic Earth" the legend explained to them. "I've always wanted to live on Earth but there's nowhere to stay". George and Sarah could've said that's sad but instead they generously said "you can live in our house with us and our parents". "That would be lovely" said the legend. Suddenly the plane landed at home. When they got inside they ate dinner with 3.0.6. They soon went to bed after discussing what to do the next day.

Early the next morning, they woke up to go to the fun fair where they did lots of: rollercoasters, rides, lucky dip games, and lots more fun things. They had chips and burgers for lunch and then they went to the water park. They did water slides, sprayers and swimming, which was extra fun for them because 3.0.6 was with them. They looked so happy that the water slide park decided to use them in their adverts and soon became famous. They got lots of money for participating at interviews, going to parties and all different types of special occasions like TV shows, water parks, and events.

They travelled around the world teaching children how to keep jolly forever. They soon took on the challenge of teaching adults as well. They taught everyone to treat others well so the planet becomes calm and peaceful, so nothing bad happens. They taught people if anything bad happens, to just keep forgetting the bad things in their memories and let them slowly drift away. George, Sarah and 3.0.6 helped make Earth a beautiful planet of laughter joy, kindness and peace. **The Midnight Fire** is still sending books to Earth.
